

Heavy Precipitation Outlook

Flash Flood Prediction Program

WINDY, SLIGHTLY COOLER AND DRY TODAY

- Northwest upper-level flow today will lead to very gusty winds this afternoon from the N/NW with gusts up to 50mph possible.
- Temperatures this morning currently in the mid to upper 50's with high temperatures this afternoon in the upper 60's to low 70's. Mostly sunny skies today with clouds increasing into the evening along with dry conditions throughout the day.
- A cold front moves in overnight which will bring overnight lows into the the mid 30's. A very slight chance for a brief overnight scattered sprinkles/light rain, although likely staying dry into Friday morning. Cooler high temperatures expected Friday in the low to mid 60's with clouds decreasing through the morning.

STORM RAINFALL POTENTIAL AND DURATION: No Rainfall expected today, overnight light rain between a TR-0.05" possible.

WORST CASE SCENARIO: Moderate rainfall overnight between a TR-0.20" from a slow moving/stationary rain shower.

A LOOK AHEAD: Generally dry conditions persist into the weekend before more active weather begins next week. Temperatures into the weekend will remain mild in the 60's to low 70's. Dry Friday through Sunday with a very slight chance for scattered rain showers/isolated thunderstorms Sunday evening. Monday will be warmer as high temperatures reach the low to mid 70's with a better chance for rain/thunderstorms Monday afternoon.

Location	Prime Time	30-Minute Rainfall and % Probability	Message Potential
Plains
