

Heavy Precipitation Outlook

Flash Flood Prediction Program

ISOLATED RAIN SHOWERS AND POSSIBLY A THUNDERSTORM LATE THIS EVENING

- Moisture from thunderstorm activity E and SE of the District earlier today has pushed into the foothills initiating isolated rain showers and weak thunderstorms over S and SW portions of the District. A threat for rain showers and isolated thunderstorms will continue over the next 3-4 hours.
- Thunderstorms will be isolated and fast moving from SSW to NNE at around 30mph. Gusty winds, lightning, and brief moderate rainfall as well as hail will be possible under the stronger thunderstorms. The fast storm motion will help to reduce point rainfall amounts.

STORM RAINFALL POTENTIAL AND DURATION: Weak thunderstorms will produce a trace to 0.10". Moderate thunderstorms may produce 0.1-0.4" in 10-30 minutes.

WORST CASE SCENARIO: A strong thunderstorm is able to develop with the potential to produce 0.4-1.2" in 10-30 minutes.

A LOOK AHEAD: A slight chance for isolated thunderstorms again tomorrow afternoon/evening with breezy winds continuing.

Location	Prime Time	30-Minute Rainfall and % Probability	Message Potential
Plains			
Adams	Current TO 200 AM WED	Trace (60%) to 0.1" (30%) to 0.4" (10%)	NONE
Arapahoe	Current TO 200 AM WED	Trace (60%) to 0.1" (30%) to 0.4" (10%)	NONE
Boulder	Current TO 200 AM WED	Trace (60%) to 0.1" (30%) to 0.4" (10%)	NONE
Broomfield	Current TO 200 AM WED	Trace (60%) to 0.1" (30%) to 0.4" (10%)	NONE
Denver	Current TO 200 AM WED	Trace (60%) to 0.1" (30%) to 0.4" (10%)	NONE
Douglas	Current TO 200 AM WED	Trace (80%) to 0.1" (50%) to 0.4" (10%)	NONE
Jefferson	Current TO 200 AM WED	Trace (75%) to 0.1" (40%) to 0.4" (10%)	NONE
Foothills above 6500ft			
Boulder	Current TO 200 AM WED	Trace (80%) to 0.1" (50%) to 0.4" (10%)	NONE
Douglas	Current TO 200 AM WED	Trace (80%) to 0.1" (50%) to 0.4" (10%)	NONE
Jefferson	Current TO 200 AM WED	Trace (80%) to 0.1" (50%) to 0.4" (10%)	NONE
