MESSAGE 1
Flash Flood Prediction Program

LOW IMPACT FLOODING

PRIORITY DISSEMINATION RECOMMENDED

We have determined that low impact flooding is likely in Boulder County (City of Boulder affected, Four Mile Burn Area affected)

including:

from: Current to 500 PM.
Prime time for flooding: Current to 430 PM.

Forecast rainfall: Moderate and strong thunderstorms will have the potential to produce rainfall amounts of 0.4-1.2" in 10-30 minutes. A large thunderstorm or slower moving thunderstorm may result in up to 2.0" of rainfall in 30-60 minutes.

The most likely areas to be impacted by flooding are:

X Mountain streams & floodplains; road crossings; canyon roads & highways; recreational trails; adjacent open space areas/campgrounds/parks; fishing access points & stream reaches; buildings near streams; utilities

X Urban streams/gulches; road crossings; recreational trails; adjacent open space areas/campgrounds/parks; floodplain properties; utilities

X Urban streets, intersections, low lying areas, known trouble spots

Additional Information: Excessive runoff is imminent or already occurring. Strong thunderstorms may also produce frequent cloud-to-ground lightning, gusty straight-line winds, large hail and possibly even a very isolated tornado.

This message is not intended for public dissemination. Please pass this information along to affected emergency response organizations (police, fire, public works, etc.) within your area.

Also, please take appropriate actions to prepare for possible flooding.

Further information will be provided to you as it becomes available.
