MESSAGE 1
Flash Flood Prediction Program
STREET FLOODING POTENTIAL

We have determined that street and small stream flooding is possible in Adams County including: DIA

from: Current to 1100 PM.
Prime time for flooding: Current to 1000 PM.

Forecast rainfall: Strong thunderstorms will have the potential to produce rainfall amounts of 0.4-1.0" in 10-30 minutes. A large thunderstorm or slower moving thunderstorm may result in up to 2.0" of rainfall in 45-75 minutes.

The most likely areas to be impacted by flooding are:

- X Urban streams/gulches; road crossings; recreational trails; adjacent open space areas/campgrounds/parks; floodplain properties; utilities
- X Urban streets, intersections, low lying areas, known trouble spots

Additional Information: Strong thunderstorms may also contain frequent cloud-to-ground lightning, gusty straight-line winds and large hail.

This message is not intended for public dissemination. Please pass this information along to affected emergency response organizations (police, fire, public works, etc.) within your area.

Also, please take appropriate actions to prepare for possible flooding.

Further information will be provided to you as it becomes available.
