MESSAGE 1'S WILL BE ALLOWED TO EXPIRE, RAIN SHOWERS TO CONTINUE OVERNIGHT WITH ACCUMULATING SNOW IN THE FOOTHILLS

- Message 1's will be allowed to expire at 8pm as the heavy rainfall threat from thunderstorms has ended with a long duration, light to moderate rainfall event expected to unfold overnight into the day on Monday.
- Now that temperatures have cooled into the 40's most areas, thunderstorm activity is diminishing and a widespread rain will develop over the District. A steady rain will fill in this evening and continue through the overnight with some lulls at times early on. Rain will generally fall at rates of 0.1-0.3"/hr into Monday morning. Additional rainfall on top of what has already occurred today expected to range from 0.5-1.5" through noon Monday, favoring areas W of I-25 and S of I-70 for higher end totals.
- The snow line will be lowering this evening to around 8,000-9,000ft between 10pm and midnight and between 7,000-8,000ft between midnight and 2am Monday. By daybreak Monday the snowline may be as low as 6,000' briefly before slowly rising as the morning progresses. Best chances for widespread rain/snow pending elevation will be through noon then become more isolated into the afternoon before drying out in the evening.

STORM RAINFALL POTENTIAL AND DURATION: Steady rain and weak thunderstorms will have the potential to produce 0.1-0.3" of rain in 60 minutes.

WORST CASE SCENARIO: Moderate to heavy non-thunderstorm rain may result in up to 1.0" of rain in 60-90 minutes.
